### **About This Content**

As the Inquisition engulfed Europe in the first centuries of the previous millenium, whispers spread of a dark hunter. These stories spoke of a man wielding weapons forged in Hellfire, laying waste to demons and witches and leaving only charred skulls in his wake. Even the the fiercest demons would scatter to the winds as soon as they heard the roar of his steel horse, and their numbers dwindled rapidly.

After slaying the last demon in Europe in a dark forest late in the fifteenth century, the man got atop his steel horse and set off to another world in need of his services. One of the villagers saved by the man said he had a face pale as bone and introduced himself Skull Chopper Chucho, and that he would return if our world was ever threatened by hellspawn once more.

This DLC contains a custom skin for Chucho Krokk in Awesomenauts. You need to have Chucho Krokk available as a playable character in order to access the skin in-game. Owning this skin will also unlock the special portrait for use in-game. This skin contains a fully customized voice set!

DjArcas has invested HUNDREDS of hours creating this amazing expansion pack to an already amazing game. This DLC adds more depth (metaphorically and literally) to the game that is FortressCraft Evolved. It adds new machines, new concepts, more play time, and also new threats and other challenges. It is well worth the price, since the game already doesn't cost as much as others like it.. Great little game for young children. Not much too it but my five year old really enjoyed playing.. A worthy offering at a good price.. Fantasttic game. A great breath of fresh air.

Allows you to play with 1 or even 0 hand at the most crucial parts, very smart design.. Myyyyyyyyyyyyyyyyyyyyyy maaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaan. Its about as basic as a tower defense game can ever get, and it relies entirely on its achievements for its goals, but its strangely addictive working out the optimal way to get to all the challenges complete. For the few pence I paid for it its lasted me a surprising amount of time and I never felt bogged down by it as I do in most other tower defense games.

Id recommend it to people who like the idea of tower defense but want to keep it light and simple rather than spend a huge amount of time and effort grinding through tonnes of it.. Really funny games ;). 10/10 would get frustrated again. Very well made visual novel with captivating story full of surprises, great character development as well as nice visuals and audio. Definitely recommended to all VN readers.

Didn't really like the decision to transfer the RAM system to Xtend episodes.. I couldn't believe what I was doing when I paid \$2 for this. Now I use it every game

Pretty good game. I will probably replay it. Not too many hidden object games. 6.5/10. Good game.

Sleek controls, and I like the customizable skills tree. Unlocking new skills improves your mobility capabilities a lot which makes completing the harder levels quite satisfying.

Recommended if you like runner/twitch games.. Unnecessary difficulty.... The 3rd and hardest game in the Gundemonium series, it has more characters and it is way more difficult than the previous 2.. Very similar to the first game, and I enjoy all the new features. The percentage based hit mechanic is very reminiscent of XCOM, in that you will have a 60% chance to hit, attempt a light hit for +18% chance to hit, so 78% chance, but will still only hit around 30% of the time. Luckily, unlike XCOM, the AI suffers the same infrequency.

However, there are some extremely annoying bugs that at this time make me say wait to purchase.

1. The recruit screen will often appear blank. Meaning you have hired a scout, but he the recruit screen will not show any gladiators to recruit. This can be fixed by reloading the game however. But, that brings me to bug 2.

2. Loading a saved game often makes the game freeze, I have lost a couple promising careers because they would no longer load.

3. May not be a bug, but seeing as I have literally never seen it fail I think theres an issue. The AI will have an item that gives them a chance to stun, something like 20-40% chance. I have never once seen this item fail for the AI. Seems suspect. It's not what I expected. I love Disney and all, which is why I bought it, but never had I assumed it would be THIS easy! The costumes honestly don't mean much either because the game itself is over in about an hour or so.. pros:

- First Pirate Game on Vive
- Ship Battles are awesome, and immersive
- SOme cool features like sea monsters etc

cons:

- linear story line and very short
- Graphics very bad, like nintendo 64

i had a great time in this game because i love piracy and because the vive needs more games, so i liked this one, of course you play it only for the vr, but its awesome, i hope the devs improve the game. I beat this game on my first try... Fun game, but feels unfinished. I don't think t's not worth the asking price.
